

Gartner Cool Vendor 2015

Gartner's Cool Vendor research "is designed to highlight interesting, new and innovative vendors, products and services."

Gartner recognized ScaleArc as a Cool Vendor in April 2015. According to Gartner, "the issues surrounding continuous operations have driven increasing use of multiserver deployments, both on-premises and in the cloud. Existing, widely used DBMSs such as, DB2, MySQL, Oracle and SQL Server are often being called upon to deliver operational characteristics that strain their

capabilities, demand additional specialized skills, and/or require alterations to existing practices. Vendors of those DBMSs are now partnering (to varying degrees) with new market entrants, who offer these enhanced capabilities."

Check out the [ScaleArc blog](#) on this report.

The Cool Vendors in DBMS, 2015 report was published April 9, 2015 by Merv Adrian, Nick Heudecker, and Adam M. Ronthal at Gartner, Inc.
